

Lesson 1.23 Using Addition for Subtraction

Think addition for subtraction. Solve each problem.

$$8 \text{ } \begin{array}{l} \text{red} \\ \text{shoe} \end{array} - 4 \text{ } \begin{array}{l} \text{red} \\ \text{shoe} \end{array} = \underline{\quad \text{L} \quad} \quad 4 \text{ } \begin{array}{l} \text{red} \\ \text{shoe} \end{array} + \underline{\quad} = 8 \text{ } \begin{array}{l} \text{red} \\ \text{shoe} \end{array}$$

$$10 \text{ } \begin{array}{l} \text{blue} \\ \text{cap} \end{array} - 3 \text{ } \begin{array}{l} \text{blue} \\ \text{cap} \end{array} = \underline{\quad} \quad 3 \text{ } \begin{array}{l} \text{blue} \\ \text{cap} \end{array} + \underline{\quad} = 10 \text{ } \begin{array}{l} \text{blue} \\ \text{cap} \end{array}$$

$$7 \text{ } \begin{array}{l} \text{yellow} \\ \text{hat} \end{array} - 2 \text{ } \begin{array}{l} \text{yellow} \\ \text{hat} \end{array} = \underline{\quad} \quad 2 \text{ } \begin{array}{l} \text{yellow} \\ \text{hat} \end{array} + \underline{\quad} = 7 \text{ } \begin{array}{l} \text{yellow} \\ \text{hat} \end{array}$$

$$10 \text{ } \begin{array}{l} \text{blue} \\ \text{flip-flop} \end{array} - 4 \text{ } \begin{array}{l} \text{blue} \\ \text{flip-flop} \end{array} = \underline{\quad} \quad 4 \text{ } \begin{array}{l} \text{blue} \\ \text{flip-flop} \end{array} + \underline{\quad} = 10 \text{ } \begin{array}{l} \text{blue} \\ \text{flip-flop} \end{array}$$

$$5 \text{ } \begin{array}{l} \text{black} \\ \text{top hat} \end{array} - 1 \text{ } \begin{array}{l} \text{black} \\ \text{top hat} \end{array} = \underline{\quad} \quad 1 \text{ } \begin{array}{l} \text{black} \\ \text{top hat} \end{array} + \underline{\quad} = 5 \text{ } \begin{array}{l} \text{black} \\ \text{top hat} \end{array}$$

$$8 \text{ } \begin{array}{l} \text{red} \\ \text{shoe} \end{array} - 2 \text{ } \begin{array}{l} \text{red} \\ \text{shoe} \end{array} = \underline{\quad} \quad 2 \text{ } \begin{array}{l} \text{red} \\ \text{shoe} \end{array} + \underline{\quad} = 8 \text{ } \begin{array}{l} \text{red} \\ \text{shoe} \end{array}$$

$$9 \text{ } \begin{array}{l} \text{grey} \\ \text{bowler hat} \end{array} - 7 \text{ } \begin{array}{l} \text{grey} \\ \text{bowler hat} \end{array} = \underline{\quad} \quad 7 \text{ } \begin{array}{l} \text{grey} \\ \text{bowler hat} \end{array} + \underline{\quad} = 9 \text{ } \begin{array}{l} \text{grey} \\ \text{bowler hat} \end{array}$$

$$7 \text{ } \begin{array}{l} \text{tan} \\ \text{shorts} \end{array} - 6 \text{ } \begin{array}{l} \text{tan} \\ \text{shorts} \end{array} = \underline{\quad} \quad 6 \text{ } \begin{array}{l} \text{tan} \\ \text{shorts} \end{array} + \underline{\quad} = 7 \text{ } \begin{array}{l} \text{tan} \\ \text{shorts} \end{array}$$

$$8 \text{ } \begin{array}{l} \text{tan} \\ \text{cowboy hat} \end{array} - 5 \text{ } \begin{array}{l} \text{tan} \\ \text{cowboy hat} \end{array} = \underline{\quad} \quad 5 \text{ } \begin{array}{l} \text{tan} \\ \text{cowboy hat} \end{array} + \underline{\quad} = 8 \text{ } \begin{array}{l} \text{tan} \\ \text{cowboy hat} \end{array}$$
